DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 44, 45, and 60-83 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Independent claims 44, 60, 64, 68, 72, 77 81, and 83 have been amended to recite that a portion of the layer of titanium alloy remains in the bottom of the contact hole following the interaction. In support of this amendment, Applicant has referred to page 9 of the specification. Admittedly, on page 9 of the specification, in lines 12-14, it is disclosed that the titanium in the layer 16 of titanium alloy proximate to the silicon is converted to titanium silicide to form the low resistance device contact 18. However, in figure 1B, contact 18 is depicted as composed of a single material layer and, as is also noted in figure 1B, contact 18 is the only portion of titanium alloy layer 18 which is proximate to the silicon substrate 14, hence, the disclosure can also be interpreted, alternately, as teaching that the entire portion of titanium alloy layer proximate to the silicon substrate is converted to titanium silicide. There is no express recitation in the originally-filed specification for claiming that a portion of the titanium alloy remains in the bottom of the contact hole after the

Art Unit: 2822

interaction. Furthermore, although Applicant's interpretation of the disclosure is supported by the originally-filed specification, alternate interpretations are also supported, as evidenced above. Hence, there is no support for the claims as presently written.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 44 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Anjum et al., U.S. Patent 5,401,674, cited in the IDS filed on May 17, 2004.

Anjum et al. disclose an integrated circuit comprising a layer of titanium alloy covering the walls and bottom of a contact hole, see figures 2 and 3, and a titanium silicide contact formed in the bottom of the contact hole by interaction between the alloy layer and the bottom of the contact hole, where a portion of the titanium ally remains in the bottom after the interaction, see figure 7 and column 6, lines 34+.

Response to Arguments

Applicant's arguments with respect to claims 44, 45, and 60-83 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 2822

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
